### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with LYTLE, J JR (39283) on 11/3/2009.

The application has been amended as follows:

(Currently amended) 21. The method of claim ~~[[20]]~~15, wherein the first and second location indicators are uniform resource locators (URLs).

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The present invention is directed to a link checking system, which checks the links within a document and determines if the link is still valid. In doing so it determines if the file has moved or permanently deleted, by referring to a mapping table stored on the remote server it repairs the broken link. The system also stores the status information about the new location of the links. These features in addition to those disclosed in the claim distinguish the presently claimed invention over the prior art.

Most notable the present invention requires the mapping table to be stored on a remote server, this differs from much of the prior art in that mapping tables are traditionally co-located with the document at the server hosting the document. Also the

Art Unit: 2445

mapping table stores prior locations with status codes one of which is that it is permanently deleted, traditionally permanently deleted files are not tracked because there is not a new associated link location. This also differs from the prior art in that mapping tables in the art are used to temporarily keep track of page changes but not to store longer term information like permanently deleted pages. Additionally mapping tables of the prior art do not retain multiple moves of the same linked document. Additionally, the mapping table is maintained in conjunction with a liking checking service that automatically replaces broken links. Therefore for the combination of the reason discussed above and in combination with the features taught together the present invention distinguishes over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached Notice of references cited (if appropriate).
